## PROFESSIONAL SUMMARY

Results-driven Software Developer with 4 years of experience building scalable web applications using JavaScript, React, Django, and Python. Recently graduated with a Bachelor of Science in Information Technology (July 2025). Proven track record of delivering high-quality software solutions, optimizing application performance, and collaborating with cross-functional teams to meet project objectives.

---

## TECHNICAL SKILLS

- Languages:** JavaScript, Python, HTML5, CSS3, SQL
- Frameworks & Libraries:** React.js, Django, Node.js, Redux, Bootstrap, Tailwind CSS
- Databases:** PostgreSQL, MySQL, MongoDB
- Tools & Technologies:** Git, GitHub, REST APIs, Docker, Postman, Webpack
- Other:** Agile/Scrum methodologies, Responsive Design, CI/CD, Unit Testing
- 

## PROFESSIONAL EXPERIENCE

### Full Stack Developer

**TechVision Solutions** | *August 2023 - July 2025*

- Developed and maintained 5+ full-stack web applications using React frontend and Django backend, serving over 10,000+ active users
- Implemented RESTful APIs with Django Rest Framework, improving data retrieval efficiency by 35%
- Built responsive user interfaces with React and modern JavaScript (ES6+), enhancing user experience across desktop and mobile devices
- Collaborated with product managers and designers in Agile sprints to deliver features on schedule
- Optimized database queries in PostgreSQL, reducing page load times by 40%
- Conducted code reviews and mentored junior developers on best practices and coding standards

## Software Developer

**Digital Innovations Inc.** | *March 2022 - July 2023*

- Engineered dynamic web applications using React.js and Python/Django stack for various client projects
- Integrated third-party APIs and payment gateways, facilitating seamless transaction processing for e-commerce platforms
- Implemented authentication and authorization systems using Django's built-in security features and JWT tokens
- Participated in all phases of software development lifecycle from requirements gathering to deployment
- Wrote comprehensive unit tests achieving 85% code coverage, significantly reducing production bugs
- Deployed applications to cloud platforms and managed CI/CD pipelines for automated testing and deployment

## Junior Web Developer

**Freelance Projects** | *June 2021 - February 2022*

- Designed and developed custom websites for small businesses using React, Django, and PostgreSQL
- Created reusable React components and Django models to accelerate development timelines
- Implemented responsive designs ensuring cross-browser compatibility and mobile-first approach
- Managed client relationships, gathered requirements, and provided ongoing technical support
- Utilized Git for version control and maintained clean, documented codebases

---

## EDUCATION

### Bachelor of Science in Information Technology

*[Your University Name]* | Graduated: July 2025

Relevant Coursework: Data Structures, Algorithms, Database Management, Web Development, Software Engineering

---

## PROJECTS

### E-Commerce Platform

- Built a full-featured e-commerce application with React frontend and Django backend

- Implemented shopping cart, product search/filtering, user authentication, and order management system
- Integrated Stripe API for secure payment processing
- **Technologies:** React, Django, PostgreSQL, Redux, REST API

## Task Management System

- Developed a collaborative task management tool with real-time updates
- Created drag-and-drop interface using React and implemented role-based access control
- Built RESTful API endpoints with Django for CRUD operations
- **Technologies:** React, Django, WebSockets, MongoDB

## Portfolio Website

- Designed and deployed personal portfolio showcasing projects and technical skills
  - Implemented smooth animations and interactive UI elements for enhanced user engagement
  - **Technologies:** React, JavaScript, CSS3, Responsive Design
-
